

SERVICE BRIEF

# Hosted Exchange: Email in the Cloud

Reliable, scalable email solutions that deliver enterprise-class capabilities without the hardware and management overhead.

## Cloud-Based Email Solutions

*Reap the benefits of Microsoft Exchange without the hardware and management requirements.*

By fully taking advantage of Microsoft Exchange, you can improve your business's operations considerably. Workers can be more productive, and they can communicate more efficiently both internally and externally. However,

this only applies to an Exchange infrastructure that's been set up and configured properly. If it's not, you run the risk of running into serious problems that could cost your company thousands of dollars in downtime and IT support.

Despite being hosted by Pulse Technology Solutions, an Exchange server still requires electricity and hardware maintenance in order to function properly. This is why hosting it in the cloud is the most viable solution. Pulse Technology Solutions Hosted Exchange solution is designed to eliminate overhead and decrease operation costs.

## Collaboration and Accessibility

*Organize and streamline your company's communication and collaboration.*

Our Hosted Exchange service allows users to

collaborate with Microsoft Outlook and archive mail automatically. Exchange hosting can vastly increase your productivity with collaboration tools, meeting schedulers, and much more. Best of all, your hosted Exchange server will be configured to your industry's best practices and security policies.

Exchange allows your company to have public folders in one or more locations on your server, which can be accessed whenever they're needed. These folders allow users to share files, email templates, and more. You can even share folders through your mailbox. With Exchange, your employee calendars can be viewed side by side to make it easier to schedule meetings and events.

## Anywhere Access

*Access your email, contacts and your calendar anytime, anywhere.*

With Pulse Technology Solutions Hosted Exchange service, you can rest assured that your server is set up with the tools and security that are necessary for your day-to-day operations. Exchange equips your workforce with the ability to check their email securely from their mobile devices, or from any browser using the Webmail portal.

Our Hosted Exchange solution allows your users to sync their mailboxes to their devices for easy access. If a user misplaces their device, it can easily be wiped remotely to ensure your data doesn't fall into the wrong hands.

## Features

- Hosted Email
- Hosted Synchronized Calendar
- Hosted Synchronized Contacts
- Mobile Device Synchronization
- Mobile Device Security
- Mobile Device Policies
- No Hardware to Manage
- Automatic Mailbox Backup

## Benefits
